

Cancer Experience Survey

Researchers at the University of Sydney want to know how technologies (websites, emails, text messages, apps) can help you during and after cancer treatment

The survey (approx. 25mins) includes questions about:

- Information you wish you knew during/after treatment
- Preferred technologies to receive health information

We invite you to take part if you were diagnosed with breast, prostate, ovarian, lung or colorectal cancer within the last 10 years & are over 18 years old
