

Kidney cancer and bladder cancer patient research information leaflet

Do you want to make a difference in kidney cancer / bladder cancer care?

We are conducting a vital research study to understand your experiences, preference of treatment and needs in living with kidney cancer or bladder cancer.

As a patient, your participation is crucial in advancing medical knowledge and potentially transforming kidney/ bladder cancer care, ensuring future generations of patients benefit from the advancements made possible by this study.

About Just Worldwide: We are an independent research company and we recruit participants for healthcare research studies. The research studies we run are non-interventional and non-promotional.

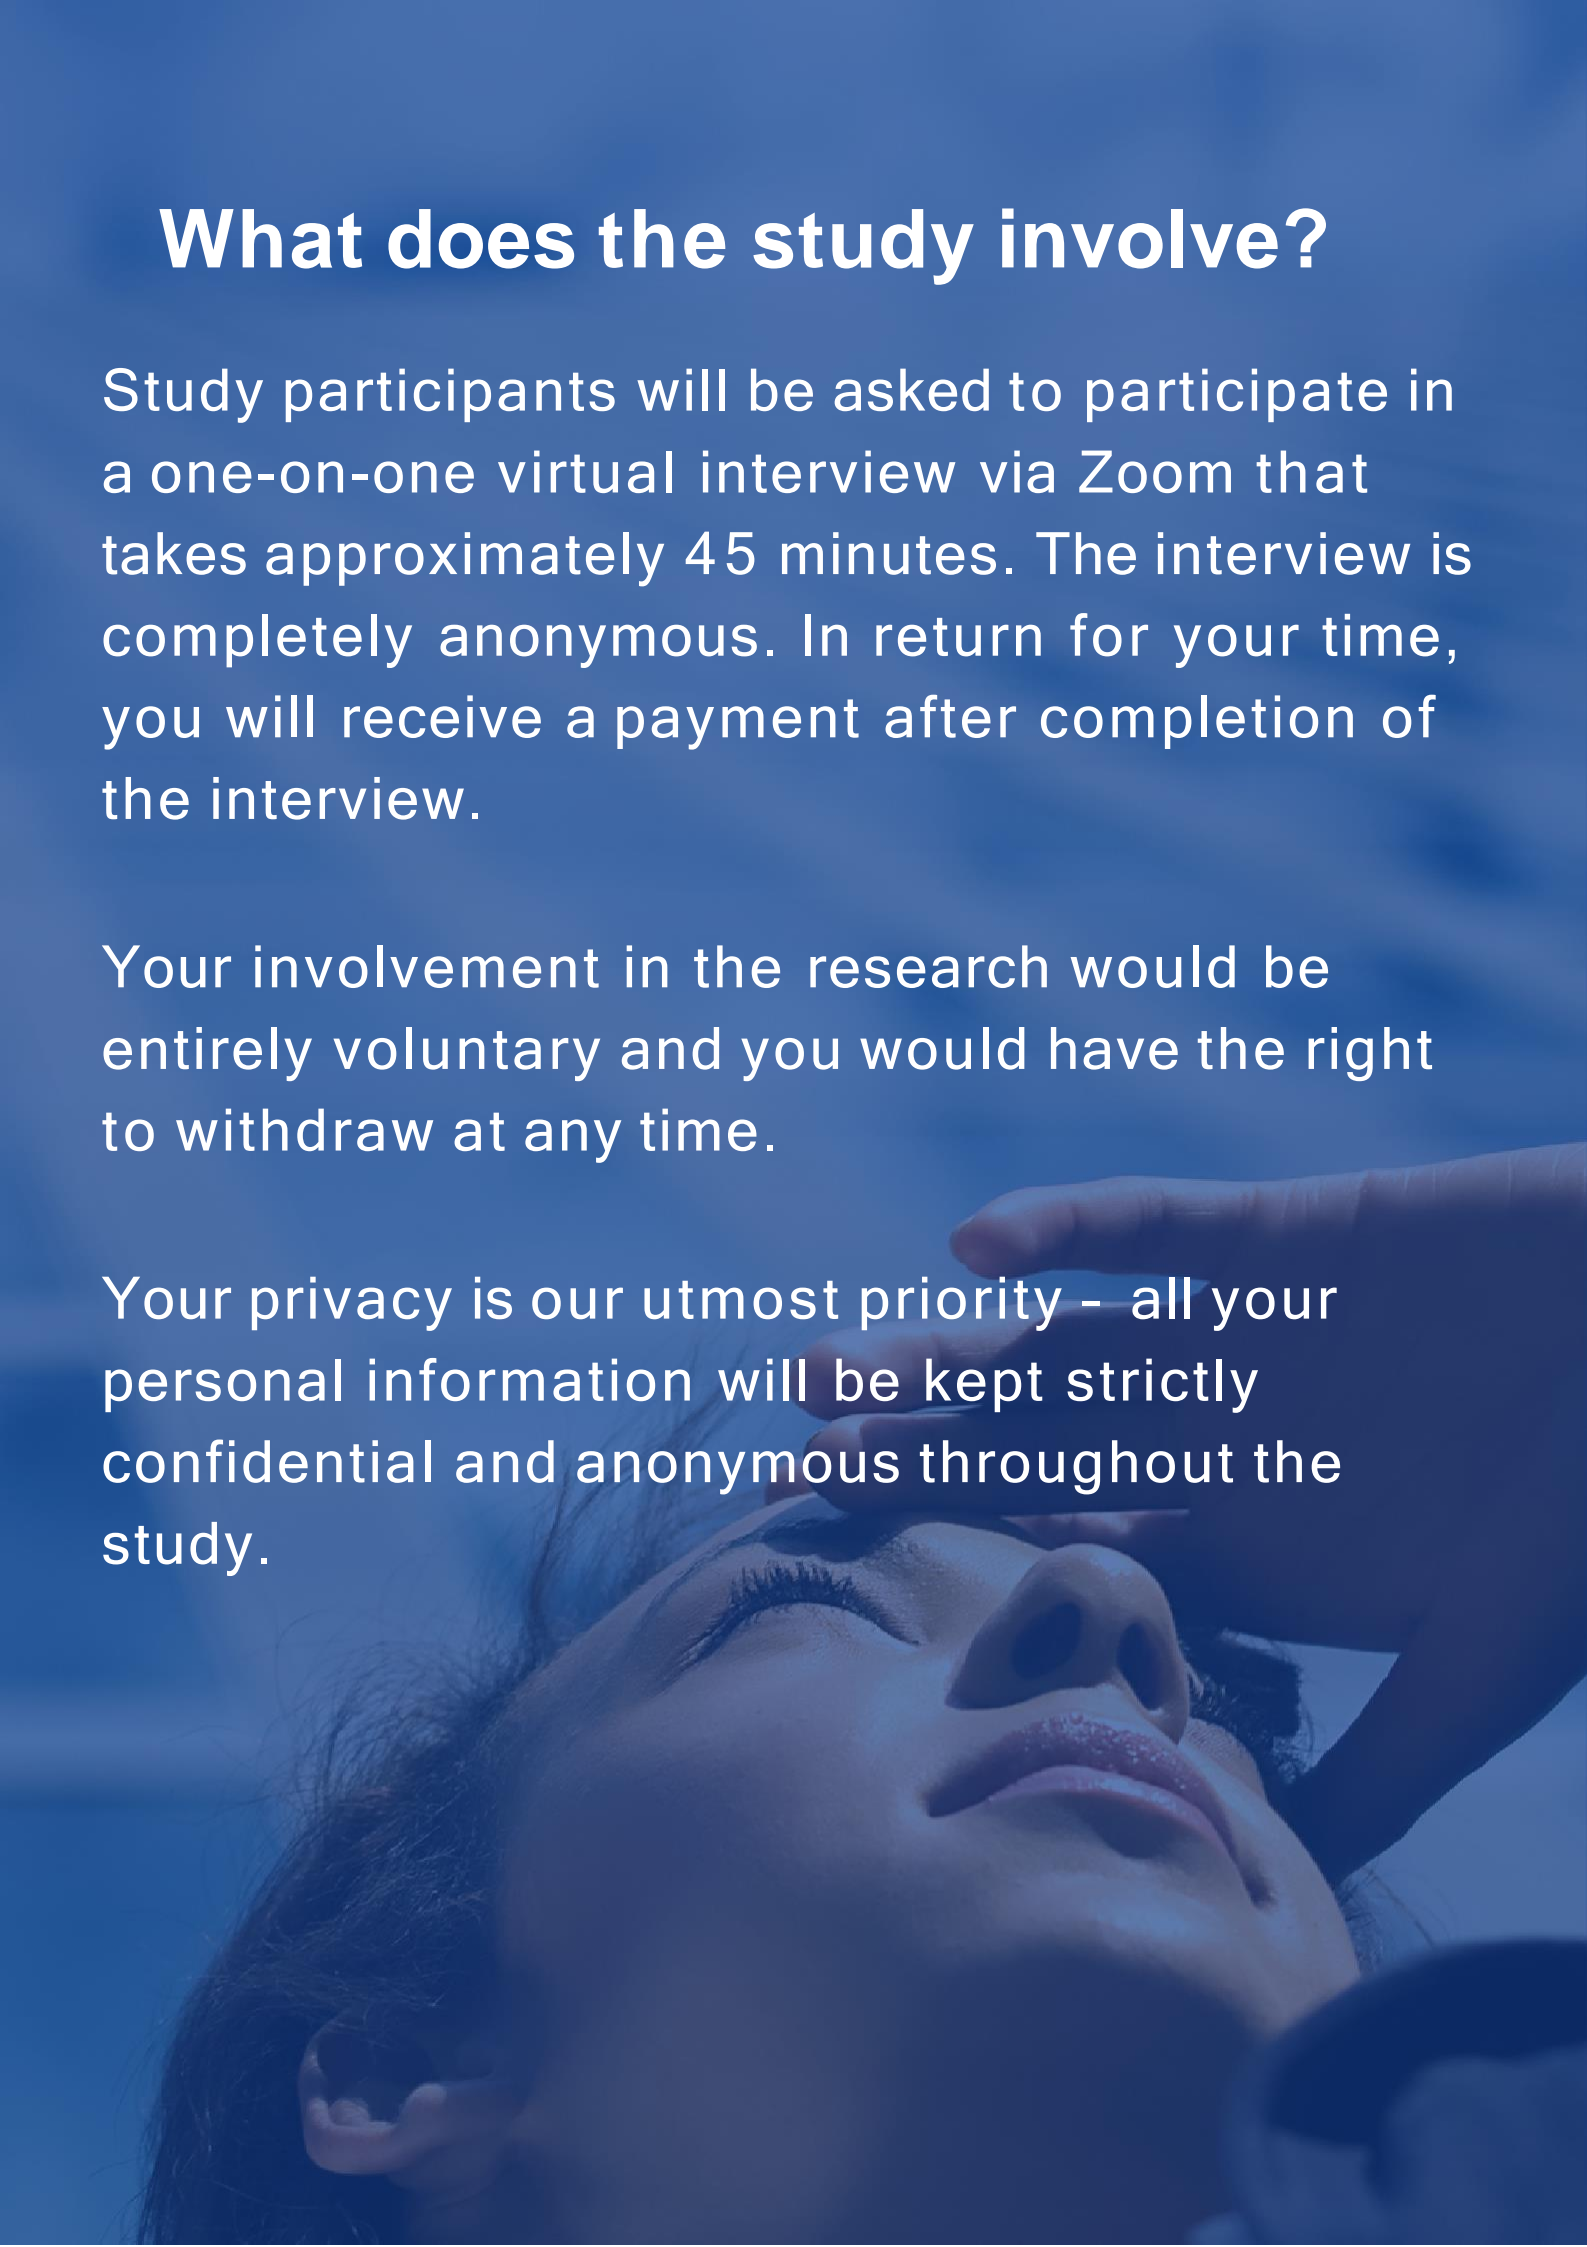

This study has been received approval from local institutional review board.

What does the study involve?

Study participants will be asked to participate in a one-on-one virtual interview via Zoom that takes approximately 45 minutes. The interview is completely anonymous. In return for your time, you will receive a payment after completion of the interview.

Your involvement in the research would be entirely voluntary and you would have the right to withdraw at any time.

Your privacy is our utmost priority - all your personal information will be kept strictly confidential and anonymous throughout the study.

Do you match the following description?

- You have a diagnosis of kidney cancer (stage II to IV) or
- You have a diagnosis of bladder cancer
 - NMIBC: Stage A to I or
 - MIBC: Stage II to III
- You live in Australia
- You are above 18 years old
- You can participate in a 45-minute telephone interview in English

Who should I contact?
